ENCOURAGING YOUNG MEN & WOMEN TO ACHIEVE THEIR GOALS IN RADWASTE MANAGEMENT

WM Symposia, Inc (WMS) believes in education and mentoring to prepare the next generation of nuclear waste professionals. One of the major challenges of our industry has been identified as the aging specialized workforce. The WM2019 Conference Theme “Encouraging Young Men & Women to Achieve Their Goals in Radwaste Management” provides an opportunity to expand our mission of supporting the next generation. Join us as we ensure the next generation of nuclear workers are equipped to safely progress our industry forward.

WMS will be hosting a University Pavilion showcasing the latest technology being developed by worldwide university programs. Opportunities are available to help support WMS’ mission to invite multiple universities to exhibit in the University Pavilion at WM2019. All contributions to the University Pavilion will receive branding visibility based on contribution level as detailed below.

HELP UNIVERSITIES EXHIBIT AT WM2019
